

American Cancer Society awards grant to Wang

UNC Lineberger's G. Greg Wang, PhD, will use the grant to study the role of PRC2 dysregulation in cancer.

The American Cancer Society recently awarded UNC Lineberger's **G. Greg Wang, PhD**, a research scholar grant. The four-year, \$792,000 grant will support his project "Deciphering the role for dysregulation of PRC2, a crucial chromatin-modifying enzymatic complex in cells, in the development of human cancer."
